Summary

Dedicated and creative front-end developer with a strong focus on crafting visually appealing and highly functional websites and applications. Proficient in JavaScript, TypeScript, and ReactJS, with experience in back-end technologies and design. Committed to delivering exceptional solutions, demonstrating strong problem-solving abilities, communication and teamwork skills, adaptability, and attention to detail to exceed client expectations.

Technical Skills

- Frontend Development: HTML5, CSS3, JavaScript (ES6+), TypeScript, ReactJS, Next.js, jQuery, Responsive Web Design, Performance Optimization, CSS Frameworks (Bootstrap, Tailwind, Material UI), State Management (Redux Toolkit, Zustand), Animation Libraries (Framer Motion, GSAP), three.js
- Backend Development: RESTful API, Node.js, Express.js, MongoDB, MySQL, PHP (familiarity)
- CMS: Wordpress, OpenCart, Bitrix, ModX and more
- Design: Figma, Adobe Photoshop
- Other: Git and version control, NPM

Professional Experience

Frontend and Web Developer | Soldsite - Digital Agency | January 2018 – Present

- Launched Soldsite, a digital agency with a focus on front-end and web development, and assembled a talented, cohesive team to extend the range of services provided.
- Completed 150+ projects for clients of all sizes, utilizing various technologies and platforms, consistently exceeding client expectations.
- Achieved an average Google PageSpeed metric of 87 across all projects, ensuring fast and efficient websites.
- Developed and launched new websites and applications for clients, providing them with a strong online presence and contributing to their growth and success.
- Played a key role in creating a CRM and analytics system for a music label, used in ad campaigns, leading to 50+ songs topping the charts in Russia. 6 of them were in the chart for more than a week.
- Crafted interactive and visually appealing websites and applications using JavaScript, React, and TypeScript, incorporating engaging animations to enhance user experiences and ensure top-notch digital solutions.
- Worked with various CMS platforms, including WordPress, Bitrix, OpenCart, ModX, and more, while also implementing custom solutions to enhance their functionality and performance.
- Collaborated with other designers and independently developed designs using Figma and Adobe Photoshop, creating modern and visually captivating user interfaces that increased user engagement.

Graphic Designer | A4 - Advertising Agency | June 2016 – January 2018

- Designed layouts for diverse projects, including brochures, banners, and promotional materials.
- Worked with vector images in CorelDraw, ensuring high-quality visuals.
- Edited and manipulated raster images in Adobe Photoshop to achieve desired results.

Projects

- [Personal Portfolio Website](#): Showcased my front-end development skills, work experience, and personal projects through a captivating website with striking design and animations..
- [Twitter Clone](#): Developed a replica of Twitter with core functionalities, with ReactJS, TypeScript and Redux on [the front-end development](#), and with Node.js, Express.js, MongoDB on [the back-end development](#).
- [Pride Website](#): Created a React-based website featuring custom animations using Framer Motion.
- [BetterStartPage](#): Designed a Chrome extension that elegantly displays bookmarks on the start page, enhancing user experience made with vanilla JavaScript and SCSS.
- [AES Encryption](#): Developed a small utility for encrypting and decrypting messages using the AES encryption algorithm. This tool works entirely on the front-end and does not send any data to the server.
- [Blending Scrollbar](#): Crafted a Chrome extension that replaces the default scrollbar with a visually appealing and user-friendly alternative for Linux and Windows users, with over 9,000 installs.
- [Soldsite](#): Founded and managed my web agency, delivering top-quality front-end development and design services to clients.
